

American Electric Power (AEP) provides additional funds to save you money!

The American Electric Power Company (AEP) has provided funding to IMPACT Community Action through its Community Assistance Program (CAP) to offer energy-efficient refrigerators, freezers and light bulbs to low-income AEP customers. These energy-efficiency measures will help eligible households reduce their energy bills.

Low-income homeowners and renters who are AEP customers residing in Franklin County and whose income is at or below 200% of federal poverty guidelines are eligible to apply for the program. The program offers each customer an energy assessment to determine if their refrigerator and/or freezer need to be replaced. The assessment will also identify the number of compact fluorescent bulbs that need to be installed.

The old energy-inefficient appliances will be removed and replaced with the new energy-efficient appliances.

If you are interested in this program and would like to schedule an appointment for the energy assessment, please contact our office at 614-453-1691 or via e-mail at cgardner@impactca.org.

Homeowners/renters must:

- Reside in Franklin County
- Be income-eligible
- Possess the refrigerator/freezer
- Renter(s) must obtain property owner's permission
